Excused: Dušan PETROVIČ (DP), Santiago RODAS (SR).

Minutes made by JPS.

ISSprOM update

The IOF council has decided during its last meeting held on November 19th, 2021, that there was a need for a common meeting between Map Commission, Foot-O Commission (FOC) and the Athletes Advisory Group (AAG) to consolidate agreement about the changes proposed in ISSprOM 2019.

This meeting will be held in the coming week with Tom Hollowell as chairperson, 2 members of the Map Commission, 2 from the FOC and 2 athletes.

To prepare for this meeting, it was decided that CC will prepare some printing tests regarding the dark green issue.

AR will finalize the ISSprOM symbols combination table.

ISMTBOM 202X final draft version

Feedbacks were received from different federations and analysed in a meeting with the MTBO working group, CC and LK.

Final draft was submitted to the Map Commission members.

It was pointed out that a new Printtech test sheet should be produced to include the new orange colour for rideable area. It was mentioned that such a colour will be tricky to maintain in the printing process and that it may be difficult to see the contour lines in such orange area.

It was agreed:

- to try to clarify the wording allowing the use of 1:7500 scale for specific categories with a magnification of 2 for the symbols. CC will make a proposal.

- to modify the illustration of the Out-of-bound areas in the pictures to represent the same situation on the field for using some tracks.

O-Map Wiki

The project is in progress. LK will transmit the information to the Map commission members on how to connect. RD will load all the symbols.

Map checking for major events

CC will send an EXCEL table listing the mails of the organizers and of the SEA.

Next meeting

As IOF Joint meeting has been cancelled, it was decided that next meeting will be held by video.
